

# AI economics, explained.

Northstar Intelligence | August 2026

**SYNTHETIC COMPANY & EVIDENCE** - Real engine calculations. No provider connected.

INCLUDED SPEND

**\$43,400**

+20.9% versus prior month

PRODUCT CONTRIBUTION

**\$32,600**

Modeled collections less product costs

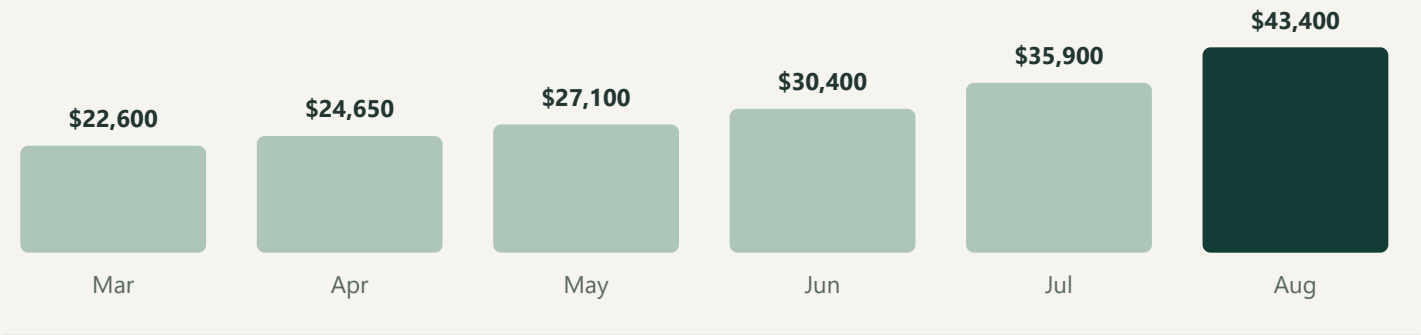

AWAITING ASSIGNMENT

**\$1,900**

4.4% of included company spend

## Spending is growing. The reason matters.

Included spend rose from \$22,600 in March to \$43,400 in August.

## Three decisions for the next review

- 1

**Investigate Document intelligence**

\$19,200 of cost against \$18,000 of associated collections leaves (\$1,200) contribution. Unit cost changed +15.8% from July. Review allocation, rejected batches and review effort.
- 2

**Keep measuring Support resolution**

7,200 accepted results at \$0.93 each. Accepted volume changed +20.0%; unit cost changed -11.4% from July. This is efficiency evidence, not verified cash savings.
- 3

**Resolve the evidence gaps**

Finance document review differs from its control by (\$220). Assign the remaining \$1,900 of shared spend before treating the workload picture as fully allocated.

# Every conclusion has a basis.

Northstar Intelligence | August 2026

**SYNTHETIC COMPANY & EVIDENCE** - Real engine calculations. No provider connected.

| WORKLOAD                | INCLUDED COST | COLLECTIONS* | CONTRIBUTION* |
|-------------------------|---------------|--------------|---------------|
| Research briefs         | \$12,200      | \$46,000     | \$33,800      |
| Document intelligence   | \$19,200      | \$18,000     | (\$1,200)     |
| Support resolution      | \$6,700       | N/A          | N/A           |
| Finance document review | \$3,400       | N/A          | N/A           |
| Unallocated AI spend    | \$1,900       | N/A          | N/A           |

\*Collections are associated by management allocation. Internal activities have no revenue or contribution assigned.

## Bundled invoice / \$64,000

Research briefs **\$46,000** | Document intelligence **\$18,000** | Remainder **\$0**

Modeled allocation of a synthetic paid-invoice fixture. The split reconciles to the original amount; it does not establish recognized revenue or AI-caused value.

## Coverage and confidence

**Cost checklist:** Research briefs, Document intelligence, Support resolution 100/100; Finance document review, Unallocated AI spend 80/100.

**Revenue checklist:** product associations 100/100; internal activities N/A. **Outcomes:** four business workloads 100/100; Unallocated N/A. Scores measure checklist completion, not independent verification or business performance.

Included scope declares 0 unpriced rows. Finance document review still has \$3,400 included cost versus a \$3,620 control. Declared coverage does not resolve this \$220 difference.

**Included costs:** inference \$28,685; human review \$12,815; shared subscriptions \$1,900. Corporate overhead is excluded. Failed and rejected batches remain in cost; acceptance rate counts batches, accepted quantities count business units.

**Reproducible facts:** monthly-1.1.0 / northstar-1.0. This handoff is rendered from the exported report, separately from browser printing.
